Abstract

We have developed a project on travel and tours Online Booking Website is a system that give you the facility of booking of any type of packages .This system is made so that costumer can easily book the packages of tourist place such as hills , trekking, adventures, etc . The Main objective of this Travel & Tourism project is to make the travel easy and comfortable for the user's right from finding the places of booking of the tickets. In this project, we have the users which we can register themselves, login and sign up. It also makes easy for users to book their trips at the reasonable rates. It includes different types of trips like family trips, couple trips, adventurous trips and so on.

Chapter:1

Introduction

1.1 Aim:

The aim of this project is to design a website on Travel and tours with all the bookings procedures .

1.2 Objective:

This project is highly programmed in html and css technology in order to provide the best services to customers and various travelling agents in the field of tourisms activities such as bookings, tourism spot details and many more. This integrated website offers one of the best way of managing all the travel related businesses. The project Tours and Travel Management System is a web based application and maintains a centralized repository of all related information. The main purpose of this project ‘Travel Management System’ is to develop a system that automates the processes and activities of a travel agency. The purpose is to implement system using which one can perform all operations related travelling and site seeing. This project is to book the tickets. This project is to provide information to tourist who want to visit many areas and to know distance between specified places . One can access this website from any corner of the world and perform the task of booking.

1.3 Scope

Tourism Management System is an integrated software developed for our tour operating companies. The main aim of this project is to help the tourism companies to manage their customers, and agents. It makes all operation of the tour company easy and accurate. The standalone platform makes tourism management easy by handling agencies request and providing servers for the customers located in different parts of the various cities. Different modules have been incorporated in this project to handle different parts and sector of the tour management field.

Chapter:2

Literature Review

The tourism management systems must include solutions for tracking visitors, analyzing trends, target marketing, and CRM. Indusa Global has introduced a software system for this purpose, called VisiTrak. The VisiTrak solution provides customers with consulting services such as Forms and Survey Design, Process Design and Re-engineering, and Workflow Optimization.

The same software development corporation has produced a semi intelligent system, called the VisiTrends. The VisiTrends solution provides decision makers with the ability to slice and dice data, analyze trends, and profile visitors demographically and psycho-graphically. VisiTrends is using machine learning and data mining techniques to guide tourists. In general, arranging a travel can be interpreted as planning a trip, which can be represented as a classical planning problem. Representing the system as classical planning problem let one enhance the existing systems with well mature developments of automated planning approaches in artificial intelligence [13, 14, 12, 10, 8, 9, 16, 15, 17, 2, 1]. In such direction, even database transactions also can be used to solve the represented planning problem [7, 5, 6, 3, 4]. In this style of planning, concrete or hypothetical database transactions can be used to generate a plan for a tourist with respect to available resources and options.

Technologies Used:

1. HTML- it is used to create the front page of the website.
2. CSS- it is used to create style sheets.

Hardware Required:

1. 40 GB hard disk
2. 256 MB RAM
3. Peripheral Devices
4. Intel core i5 Processor
5. Windows 7 Home Basic

Chapter:3

Methodology

3.1 Problem Statement

The problem is to develop a web based system to manage travel and tours website so that it saves time. It should help people in doing online booking for them to the places they want to go all over India. It should consist of the following things:

1. Register a new applicant
2. Applicant can sign in to the website
3. Applicant can login to the website if he has registered himself
4. Website should show various places across India for travelling which the applicant want to travel.
5. It should have all the booking options for the applicant to book the tickets.

3.2 Analysis & Design

At the first we have made 3 frames for heading “Bharat Bharaman Tours and travels”. Then we have designed a topnavigation class which consist of Home, Destination, Contact us, Register, booking and sign up. And designed a search class to search for any information related to tours and travels. This class also consist of logo of our company. The second frame consist of information about Our company. And the third frame consist of copyright page.

Frame1: frame 1 consist of 3 rows and 2 columns table in which the 1st row consist of name of the company. The 2nd row consist of top navigation bar which contains links to different sites. The 3rd row consist of Images and video (using iframe) related to our site. The top navigation bar consist of following options that link to other pages:

1. Home-
It is the home page (main page) of our website.
2. Destination -
It consist of various attractive places to visit in India. In it we have included hyperlinked images of the sites named as historic sites, couple tours, monumental visits, beach tours, family tours etc.
3. Booking-
It consists of online booking for the applicant. In this there is a form which is created using a table. This form consist of Name of the person, Email address, residential address, town, pin-code, place to visit and selection of the budget and the no. of people visiting that place, the vehicle required for travelling and at last it consist of the feedback of the person as an input. And at the end for submitting the data we have use the submit button and Reset button to reset the data.
4. Contact Us-
It consist of the contact details of the company i.e. its telephone number, website email id and the address of the company.
5. Register-
It consists of the registration form for the applicant which is new to our website. The form is created using form tag in html. The form consist of First name last name, date of birth, age of the person, gender of the person, his address and mobile no. . And at the end for submitting the data we have use the submit button and Reset button to reset the data.
6. Sign Up-
It consists of Sign Up option for the applicant who has already logged into the site. It consists of username and password as an input and the signup button to log in.

Frame2:It consist of a webpage which has the information about India, our company , about our website and the company members who are working for our company.

Frame3:This frame consist of a copyright page.

1.Taj Mahal, Agra	<p>The Taj Mahal is one of the seven wonders of the world and is considered to be the most popular tourist attraction in the country. A symbol of love, the Taj was built by Mughal Emperor Shah Jahan for his queen Mumtaz. Tagore described the Taj as a "teardrop on the cheek of eternity". The monument attracts a lot of tourists all around the year. Best Time to Visit: October to March Entry Fees : For Foreigners INR 1100 and for Indians INR 50</p> <p>"Click to get your bookings done now!"</p>	
2.Qutub Minar, Delhi	<p>At a height of 234 feet, this minaret is the tallest individual tower in the world and is a perfect display of Mughal architectural brilliance. The soaring and brave tower that allures tourists despite being destroyed by ravages of natural apocalypses several times, Qutub Minar is the tallest individual tower in the world and second tallest monument of Delhi. A UNESCO World Heritage Site, it is located in Mehrauli and its construction was started in 1192 by Qutb Ud-Din-Aibak, founder of Delhi Sultanate. Later, the tower was built by various rulers over the centuries. The sight of this glorious monument takes you back to the rich history of India. Best Time to Visit: Throughout the year Entry Fees : INR</p> <p>"Click to get your bookings done now!" 100 for Foreigners and NR 30 for Indians</p>

1. Badrinath Temple	<p>Situated close to the Alaknanda River, the abode of Lord Badrinath is located in the Chamoli district, a small town of Badrinath (Uttarakhand). This holy shrine of Lord Vishnu forms a part of the four holiest sites (Char Dhams) in Hindu religion. It is also one of the four Chota Char Dham pilgrimage sites (comparatively minor pilgrimage sites). It is one of the 108 temples dedicated to Lord Vishnu (Divya Desams), which find mention in the works of Tamil saints who existed from 6th to 9th century.</p> <p style="color: #FFD700; text-align: center;">Click to get your bookings done now!</p>	
2. The Konark Sun Temple	<p>The Sun temple is situated in the small town of Konark, which is situated in the Puri district of Odisha. This marvel of architecture is dedicated to Lord Sun. And resembling his carriage, the temple has been built in the shape of a chariot, which has twelve wheels and is shown as being dragged by the seven horses. The temple is believed to be constructed in the 13th century by a king called Narasimhadeva. Like with most things in India, this temple too has connections with a few legends. As per one of the legends, God Krishna cursed, one of his own sons with leprosy. To seek penance, Samba worshiped Lord Sun (Surya) for a period of twelve years. Pleased with his devotion, Surya healed him. Samba made the Sun temple in return to express his gratitude.</p> <p style="color: #FFD700; text-align: center;">Click to get your bookings done now!</p>

1.Yarada Beach, Visakhapatnam- Andhra Pradesh	<p>Andhra Pradesh too is gifted with many exotic beaches that share their shoreline with Bay of Bengal, similar to Odisha. Yarada Beach is one among the many beautiful and unspoiled beaches of Andhra Pradesh, which aren't famous for parties or water sports activities but for their beauty and serenity. Unlike Goa and Kerala, Andhra don't have many late night beach parties or five star properties, but it has the second-largest coastline and the longest beach road in the country. Located at a distance of 15 km from Visakhapatnam, Yarada is a pristine and uninterrupted coastline, which leads to Dolphin's Nose Lighthouse which sits atop Black Mores "Click to get your bookings done now!"Hill.</p>	
2.Arambol Beach- North Goa	<p>Considered to be a heaven for the hippies, Arambol Beach embrace some of the best natural attractions even when there are no no resorts or classy hotels on the beach side. The place is untouched and serene with just a few basic guesthouses, and some standard hotels and huts on the seashore. The visitors love it this way and feel happy indulging in simple activities like swimming, sun basking, beach walking, etc. Other attractions at Arambol Beach are paragliding from the cliffs that surrounds the beach, dolphin watching boat trips, and shopping from colorful beach bazaars that sell clothes, bikinis, junk jewelry, and handicrafts. One can also find some good cafes along the beach side, which offer tasty delicacies from Italy, Goa, and India "Click to get your bookings done now!"</p>

Chapter:5

Summary and Conclusion

5.1 Summary

The Travel and Tourism Management is designed with the help of html and css. In this one can register himself and then login later on. It consist of various places wher the applicant can search the places which he wants to visit and can also search for the charges applied to it. If the applicant wants to visit the places and want to do booking for it, he can do so . The website has the online booking option available through smart cards which is very much time saving. It also consist of various packages by which one can get visit only related places like family trips , adventurous trips, traditional trips etc.

5.2 Conclusion

Tourism is currently recognizes as global industry which is highly growing at a high rate like other industry. There are many different activities are occurred in tour activities. Our “Tours and Travel Management” web based project helps in online distribution of tour packages, online booking and registration of the applicant. This “Tours and Travel Management system” can be fully customized with integration different API’s. It has friendly environment that connects customer willingly. Finally we can say that this Web Based System will help tour manager to control and handle the tour related act activities effectively and efficiently.

5.3 Proposed Future Work

Future development is very important for each project because it includes latest features in the System. It reduces software bugs and problems. It creates strong relationship with customer according their feedback choices. We will integrate some dynamic features in our Tours and Travel management System which features may enhance our quality of website.

- E-mail and Mobile confirmation System.
- Opening of website in anroid mobiles.
- Implementing bookings of hotels and cars/buses.
- Online payment System
